OLD BUSINESS

3. **ATV Needs Assessment: Parameters Discussion – RAC Recommendations Discussion - Guy**

Staff has incorporated information on Parameters within the ATV needs Assessment and recommends RAC members to re-read the *Recheck Wants/Needs Section* on p. 5 so that you can pick up the thread of the last recommendation that the RAC made which is that: "There is a need for a designated ATV trail". What I have tried to do is keep true to what has been discussed, provide some additional context and information to aid that discussion. On page 11 a section entitled *Questions to Consider and Make Recommendations on per Parameters Discussion (Draft)* has been included to facilitate the decision making process. Here is an outline of the Parameters Discussion section which begins on p. 6:

- Definition of Parameter(s)
- Current Forest Classification Parameters (per County Board Resolution)
- Beltrami Forest Classification Comparison
- Beltrami Trail Classification Definitions
- Hubbard County/DNR Limited Classification Comparison
- Round Lake Wild Forest Recreation (RLWFRA) Proposal
- MN Biological Survey (MCBS): Becker County
- MCBS Definitions (Outstanding, High etc.,)
- GIS Toolkit Exercise
- Questions to Consider and Make Recommendations on per Parameters Discussion: RAC Recommendations

4. **AIS Discussion at County Board on 9/25/2011: Update? Terry Kalil (Not Available - NA)**
