Impervious coverage refers to anything water cannot pass through. Structures, areas covered by a roof, concrete, asphalt, Class 5, sidewalks, patio pavers, etc. should all be included in this calculation. Decks should be included in this calculation if they have plastic underlayment or impervious surface underneath. Anytime you exceed 15% lot coverage a stormwater management plan and/or mitigation is required. **INCLUDE PROPOSED STRUCTURES IN CALCULATION.**

Please Note: Unless otherwise provided, a minimum of a 12 foot wide driveway from the nearest road right of way to the proposed structure must be included in both your plan and impervious surface calculation.

REASON FOR CONDITIONAL USE REQUEST: The County has acquired Parcel 060312000 adjacent to the existing Middle Cormorant Swimming Beach, and been granted a conditional use permit for public use. As a condition of public use and planned improvements to both parcels, the neighboring landowner (PIN 0603013000) has requested the construction of a 6' tall privacy fence on the lot line within the shore impact zone, set back 12' from the OHWL. While this is allowable on an agriculturally zoned parcel, the Becker county ordinance restricts fences to 4' in height within the shore impact zone.

Please answer the following questions as they relate to your specific CUP request:

1. **Effect on surrounding property.** That the conditional use will not harm the use and enjoyment of other property in the immediate vicinity for the purposes already permitted, nor substantially diminish or impair property values within the immediate vicinity.

The proposed privacy fence is being constructed at the adjacent landowner's request to provide a visual and auditory barrier to the public use of the aforementioned parcel. Once constructed the fence will enhance rather than diminish the neighboring landowners use and enjoyment of their property, and prohibit the public from infringing on their privacy.

2. **Effect on orderly, consistent development.** That establishing the conditional use will not impede the normal, orderly development and improvement of surrounding vacant property for uses predominant in the area.

This project will not affect development of surrounding property. By providing a clear, defined boundary between publicly used space and private property this fence will ensure orderly use, prohibit trespassing and offer screening for both the public and neighboring homeowners.

3. **Adequate facilities.** That adequate utilities, access roads, drainage and other necessary facilities have been or are being provided.

As defined on the attached plans, adequate access, drainage, stormwater control and public facilities will be afforded by the planned improvements to the Middle Cormorant Swimming Beach.

4. **Adequate parking.** That adequate measures have been or will be taken to provide sufficient off-street parking and loading space to serve the proposed use.

As also defined on the attached plans, planned improvements will provide orderly, off street parking as well as the addition of two handicapped spaces and signage to comply with ADA regulations.

5. **Not a nuisance.** That adequate measures have been or will be taken to prevent or control offensive odor, fumes, dust, noise and vibration, so none of these will constitute a nuisance, and to control lighted signs and other lights so that no disturbance to neighboring properties will result.

The sole purpose of this application is to provide the requested measures to limit disturbance to neighboring property owners and prevent public use of the property from creating nuisance.

6. **Additional criteria for shoreland areas.** In Shoreland areas, it shall be found that adequate measures have been or will be taken to assure that:

- a. **Pollution.** Soil erosion or other possible pollution of public waters will be prevented, both during and after construction;

As indicated on the attached Site Plan and Stormwater Prevention Plan (SWPP), adequate erosion control measures will be employed both during and post construction.

- b. **View from public waters.** That the visibility of structures and other facilities as viewed from public waters will be limited;

The proposed fence and planned vegetation will afford additional screening of structures and facilities from the waterward side of the parcel.

- c. **Adequate utilities.** That the site is adequate for water supply and on-site sewage treatment;

While the site is adequate for water supply and on-site sewage treatment, no potable water will be provided at the site. Existing restroom facilities will remain on-site but be retrofitted to afford ADA accessibility.

- d. **Watercraft.** That the types, uses, and number of watercrafts that the project will generate can be safely accommodated.

Existing covenants prohibit watercraft launching and landing at Middle Cormorant Beach. Current buoys and barriers will remain and additional signage will be placed strategically to inform the public that watercraft are prohibited.

Becker County Planning Commission

Detroit Lakes, Minnesota

I am applying for a Conditional Use permit for my new building at 18722 Cummings Road in the Brandy Lakes Subdivision of Becker County. The reason for this application is that we would like to possibly rent out at least one, or maybe both of the heated work bays because now we do not think we will require any heated space for our own personal use.

In late September 2017, I applied for a building permit with Becker County, and on October 2, 2017 I received the Permit # 080717000 (copy attached). We adhered to all requirements and setbacks, and exceeded all County required setbacks by at least 10 ft to assure that we were in compliance.

Feldt Excavation did the earth work about a week after the permit was issued and FOLTZ began construction shortly thereafter. We used all local contractors, Foltz, Feldt Excavation, and Ace Electric for this project.

This is a 40' X 120' FOLTZ building with partitions installed for one 40' x 80' personal cold storage area (70% + - of the total building area), and two separate 20' x 40' heated bays, (15% + - of the building area each).

When I purchased this property, I specifically asked Mike Ring of Counsellor Realty in Detroit Lakes if there were any restrictions on property use on this lot. He called the County Records office and they informed him that there were none on record, so we proceeded with the purchase. Mr. Ring called and asked again just before the closing and they gave him that same information.

I am filing this early but would like to be scheduled for the meeting on April 10, 2018 because it is now too late to file for the February 13 meeting, and I will be out of the country on the dates of the March 13 meeting and not returning to the US until the 15th of March. I would like to be at the meeting in person in case there are any unanswered questions on the application form.

Thank You

Lonnie Nelson
